What is Being Done to Reduce Flood Damage?

In an effort to reverse the trend of rising flood damage, local, state, & federal agencies have undertaken a variety of programs that can be grouped into three general categories:

- A. Keeping flood waters away from people & buildings by:
 - 1. Constructing dams, levees, & floodwalls
 - 2. Enlarging or altering stream channels
 - 3. Decreasing runoff through land treatment measures
- B. Keeping people & buildings away from flood waters by:
 - 1. Floodplain regulations
 - 2. Purchasing floodplains to maintain flood capacity
 - 3. Flood Warning systems & preparedness planning
- C. Reducing the cost of flooding to individuals through:
 - 1. Flood Insurance
 - 2. Flood Disaster Relief
 - 3. Tax Adjustments
